IMPACT STORY

Boniface Mfula

The journey of BONIFACE MFULA is an example of integrating profession with divine calling. Initially equipped with a Degree in Building Science and Master's in Project Management, Mfula recognized the need for a strong theological foundation to match his professional expertise. His decision to earn a Degree in Theology from CCM became a pivotal turning point in his life. This unique fusion of construction and clergy has borne significant fruit. Mfula strategically uses construction projects as platforms for evangelism & church planting. Since his graduation from CCM, he has successfully established three new churches in Zambia in Lumwana, Chingola and Lusaka. Now pursuing a PhD in Christian Leadership at CCM, Mfula's influence continues to grow through his Christian publications & his mentorship of a network of over 15 lay pastors across Zambia. His life demonstrates that professional excellence & spiritual calling are not separate paths, but powerful allies in building God's kingdom.
